PROFESSIONAL SUMMARY

Data Science Fresher with hands-on experience in Data Analysis, Data Visualization, and Reporting through internships and academic projects. Proficient in Python, SQL, Excel, and Power BI, with a strong foundation in Data Cleaning, Exploratory Data Analysis (EDA), and Dashboard Development. Seeking entry-level opportunities as a Data Analyst, Data Science Fresher, or AI/ML Engineer in a data-driven organization.

TECHNICAL SKILLS

Programming & Analysis: Python (Pandas, NumPy, Flask), Excel

Data Science & ML: Machine Learning Fundamentals, Statistics, Feature Engineering, Model Evaluation, EDA

Data Visualization & BI: Power BI, Power Query, DAX, Dashboarding, KPI Reporting, Tableau, AI Visualization

Tools: Microsoft Power BI, Microsoft Excel, Jupyter Notebook, Tableau, GitHub

EXPERIENCE

Data Analyst Intern | CodeFirst Technology

Remote

- Performed data cleaning, validation, and exploratory data analysis (EDA) on structured datasets
- Analyzed data using Python and Excel to generate actionable insights
- Built interactive Power BI dashboards to visualize KPIs and performance trends
- Reduced manual reporting effort through automated dashboards

GenAI Powered Data Analytics Job Simulation | Tata (via Forage)

Virtual

- Completed practical tasks in exploratory data analysis and risk profiling
- Predicted delinquency with AI and built a business report for data storytelling in collections strategy
- Implemented an AI-driven collections strategy as part of the simulation

Data Analytics Job Simulation | Deloitte Australia (Forage)

Virtual

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau to visualize forensic findings
- Used Excel to classify data and draw business conclusions

PROJECTS

MBA Eligify — From Score to B-School *Python · Flask · Pandas · Render Deployment*

- Built an AI-assisted platform that matches CAT percentile and category to 70+ top Indian MBA colleges, ranking them by ROI and NIRF data
- Implemented Flask backend with Pandas for real-time eligibility filtering, sorting, and JSON APIs; integrated Excel dataset with 30+ attributes per college
- Designed a responsive frontend (HTML, CSS, Vanilla JS) with interactive search, filters, and detailed college modals (fees, placements, scholarships)
- Deployed on Render with GitHub CI/CD, enabling automatic updates and live demo access

Netflix and Notes: Screen Time Habits and Study Discipline of Students *Power BI · Power Query · DAX*

- Designed an interactive Power BI dashboard analyzing survey data (98 responses) on OTT usage, screen time, procrastination, and study discipline across demographics
- Applied Power Query for data cleaning and built DAX measures (Average Screen Time, Study Hours, Procrastination Index) to generate actionable KPIs
- Visualized insights with multi-page dashboards (platform preferences, discipline scores, focus methods, gender/academic comparisons)
- Identified key findings: higher screen time strongly linked to procrastination, highlighting need for structured focus strategies and balanced digital habits

MBA Admission Prediction *Machine Learning · Python · Logistic Regression*

- Built a machine learning system to predict MBA admission outcomes using academic and entrance exam data
- Applied Logistic Regression for binary classification with thorough data preprocessing and exploratory analysis
- Analyzed key features (CGPA, CAT scores, academic background) for their impact on admission chances
- Achieved high predictive accuracy, demonstrating an end-to-end supervised learning workflow

Student Marks Analysis Dashboard *Power BI*

- Built an interactive Power BI dashboard to analyze student performance across subjects and classes
- Enabled identification of top performers, subject-wise averages, and overall academic trends
- Implemented dynamic visuals and slicers for class-wise filtering and performance exploration

EDUCATION

Bachelor of Computer Application (BCA) – Data Science

Jul 2023 – May 2027

Sri Balaji University, Pune

Relevant Coursework: Data Science, Machine Learning, Statistics, Python Programming, Data Structures, Data Analysis, Data Visualization

CERTIFICATIONS

- Google — Data Analytics Professional Certificate
- Tata GenAI Powered Data Analytics Job Simulation — Forage
- Deloitte Australia's Data Analytics — Forage Job Simulation
- Nestlé e-Learning 2026 | Resilience Program
- Coursera — Data Analytics with Skills.AI: Create Data Visualizations
- LinkedIn Learning — Moving from Data Analyst to Data Scientist

LEADERSHIP

- Discipline Co-Ordinator – School of Computer Studies
- Member – Sports Council

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi

Availability: Open to full-time, internship, and remote roles
